

B&W Bowers & Wilkins

B&W 685 Wins EISA Award

Official quote from EISA:

"Near the 600 Euro price level, B&W's 685 is hard to beat. Its 16cm Kevlar® mid-woofer features a profiled cast basket, and thanks to B&W's latest aluminium tweeter with a small neodymium magnet, the two drive units can be located much closer together, achieving a wider vertical angle of coherent response. A foam ring and bung enable users to fine-tune the front-facing reflex port for optimal tonal balance and low-frequency control in locations close to a wall and out in the room. This design is powerful, efficient and well-balanced, and looks as good as it sounds with a choice of four contemporary enclosure finishes."
